SOURCE:

Eight MiG-15's were observed on Bad Voeslau airfield on 21 April in addition to the number of planes usually located there. On 17 and 19 April, 11 MiG-15's were parked in aircraft revetments on Aspern airfield. The aircraft dispersal areas, which are generally used for the parking of planes, were empty. The activities at the airfield indicated that an inspection was being held. Intensive leveling work was observed at Zwoelfaxing airfield between 20 and 28 April.

25X1A

Comment: It is unknown whether these developments are connected with maneuvers or with a regrouping of Soviet air units in Austria.
